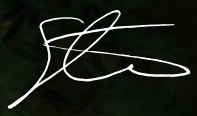
CO-FOUNDERS OF GREENPLANET NUTRIENTS

Pacific Northwest Garden Supply Ltd was started in 1993 with one store in Surrey B.C. by Steven Betts. Previously working in the hydroponics industry Steven had a strong desire to learn and sell hydroponic equipment as well as support urban agriculture.

With the location and timing ripe for growth, Steven brought on his first partner Justin Cooper to help him with the original location. It was here, at their first store where they saw a gap within the market to produce the world's finest nutrients. Inspired from the place we call home, the pacific northwest has been an inspiration and a home for the craft growers over the years. It is here where we've been fortunate to be apart of a thriving community of like-minded individuals with the sole purpose to bring out the best from one another to cultivate a greener, cleaner future.

> ***From the hydro store, we saw the need for better fertilizer and it was from these humble beginnings that we evolved into manufacturing of our own nutrients.***
>
> **STEVEN BETTS**



> ***We're passionate about sourcing the purest, cleanest water, using the highest quality materials, ensuring that the environment is protected and improving the lives of the people who grow with us.***

GET TO KNOW OUR ICONS

We've made it simple for you to find the right GreenPlanet Nutrient product by creating our very own iconography system. Whether you want to increase yields, aroma or pH levels, we have a product for you.

TYPE OF NUTRIENT

Dry Fertilizer

This fertilizer is completely made of natural materials, such as compost and manure, which are left to dry into a solid form and then used in gardens or fields.

Liquid Fertilizer

The fertilizer is produced in a liquid form from completely natural raw materials that deliver readily available nutrients to your plants

Base Nutrient

The foundation of a plant's diet. Base nutrients provide all the necessary macronutrients, micronutrients and secondary nutrients and elements for plant growth such as Nitrogen, Phosphorus, Potassium, Calcium, Magnesium, Iron, Manganese, Zinc, Sulfur, and several other minor elements.

Additive Nutrient

This icon means that this particular product can be added to a plants diet to optimize performance in a specified area such as aroma or bloom enhancement.

Maintenance

Some of our products specialize in maintaining or preserving a particular area in a plant's life cycle, such as pH levels.

Starter Kits

Our starter kits are a great sampler of what GreenPlanet Nutrients feed programs can do.

PLANT STAGE

Vegetative Stage

When you see this icon on one of our products, you'll know that you can use it during the vegetative stage of your plant to ensure the growth & development.

Flowering Stage

GreenPlanet products with this icon mean that it is ideal to use during the flowering stage, which helps the yield of your flower sets, vegetables, and fruits.
